No 12079/671 Dated 21/4/13 Received 24/4/13

Diary No 6577 | Enclos 5 Spare Copies | Serial No 1

BRIEF ABSTRACT OF LETTER

Forwards copy of a letter dt 21/4/13 from S Ganalapura Sastri, B.A., studying organic chemistry in the Indian Institute of Science, Bangalore, enquiring for a Damodar Das Scholarship to specialize in organic chemistry with special reference to Agricultural Chemistry in Germany and Recommends that the Scholarship applied for, may be sanctioned for 3 years.

NOTES AND ORDERS

Submitted with Reference. Ganalapura Sastri has been granted a Scholarship of Rs 100/pm from the Damodar Das Scholarship Fund for 3 years from 5-7-1912 to enable him to study Organic Chemistry in the Indian Institute of Science

5 Mr Garalapuri Sastri appears to be a very intelligent young man & judging from the certificates of his professors he seems likely to make good use of a course of study in a German University. He seems to be a fit candidate for a Damodar Das Scholarship

6 The Damodar Das Scholarship fund opened with a small debt balance on 1-1-13 but the interest income in 1913 will leave a sufficient balance to warrant the grant of at least 2 new scholarships this year

1st C

CSB 1/5/13

7 A Scholarship of 200£ may be given to this Candidate. We shall want one or two such men for the Agr. Deptt. and the Candidate is likely to do very well

17) *Submitted to His Highness*

These papers relate to the application of Mr B Narasimha Iyengar B A Assistant Chemist in the Agricultural Department for the grant of a scholarship for the study of Agricultural Chemistry in Gottingen University, Germany

2 The applicant appears to have had a successful collegiate career and is reported to be working satisfactorily in the Agricultural Department where he has been employed for nine years Dr Coleman has forwarded the application for the favourable consideration of Government

3 The First Councillor recommends that Mr Narasimha Iyengar may be granted a Damodar Dass Scholarship of £200, in addition to a subsistence allowance of Rs 50 per mensem the latter being debited to the State Budget

4 Mr Garalapuri Sastri, B A holder of a Damodar Dass scholarship of Rs 100 per mensem in the Indian Institute of Science has also applied for a foreign scholarship for the study of the same subject He has since stated that if Mr Narasimha Iyengar is granted a scholarship for the study of Agricultural Chemistry he would be willing to qualify himself in any other branch of Chemistry relating to manufacture and industries Dr Coleman who was consulted in the matter states that his Department is not likely to require more than one trained hand in the near future & that as between the two applicants he would recommend Mr Narasimha Iyengar as he has already experience of practical work in the Department I agree that for t

study

study of Organic Chemistry in special relation to Agriculture Mr Narasimha Iyengar may be preferred on account of his experience in the Agricultural Department

5 But Mr Garalapuri Sastri's application also deserves in my opinion the favourable consideration of Government He has graduated with distinction in Chemistry and has taken a post-graduate course in Organic Chemistry in the Indian Institute of Science He has enthusiasm for the subject and being yet young he is I think well qualified for specialising in industrial Chemistry In Germany the value of products manufactured yearly with the aid of industrial Chemistry is estimated at over 80 crores of rupees

6 I consulted the Councillors informally and they are agreeable to the grant of a scholarship to both the applicants

7 I therefore solicit His Highness's sanction to the grant of a scholarship of £200 with second class passage for a period of three years to both Messrs Narasimha Iyengar and Garalapuri Sastri - to the former for the study of organic Chemistry with special reference to Agricultural Chemistry, and to the latter for the study of Organic Chemistry in its relation to manufacture and industries A subsistence allowance of Rs 50 may also be sanctioned to Mr Narasimha Iyengar Both the candidates will be required to produce a certificate of physical fitness from the proper authority

8 The General Scholarship Branch of the Damodardas Fund shows a debit balance this year, but the First Councillor thinks that provision may be made for the two scholarships and that the debit balance wiped off by general savings later on The Second Councillor is

9

however against the grant of any scholarship out of the Damodardas Funds though he has no objection to the grant of the scholarships this year out of State Funds This aspect of the question will be further considered and submitted to His Highness for orders

9 A scholarship has recently been sanctioned by His Highness for Mr P H Ramayya and the question whether all these scholarships should be met out of the Damodardas Funds or State Funds or from both is under examination I think it desirable that in the interests of our service and the general progress of the country we should encourage more of our young men to go abroad for receiving training and in this view a scheme for the grant of foreign scholarships out of State Funds is being developed and will be submitted for His Highness's sanction shortly but as the course of study on which these candidates intend to enter will commence from 1st October next, early orders have to be passed regarding scholarships for this year It has therefore become necessary to submit these proposals before the new scheme could be approved by His Highness

10 I have discussed the matter with the Councillors and they agree with me that action herein recommended is desirable I therefore solicit His Highness's sanction to the grant of the two scholarships now recommended

Serial No 34

I do not see the necessity of sending a student from Bangalore to study Organic Chemistry in Germany & the Institute of Science under Prof Sudborough he will get all the training he requires I am in agreement with the First Counsellor that the DD scholarships should be given to acquire practical experience of industrial chemical processes This means however that instead of going to a College or University the student will have to enter a factory in which the particular process he wants to study carried on This may prove difficult as in most factories the details of processes are regarded as trade secrets but in wood distillation there should be no great difficulty - Messrs Turnbull & Co of Glasgow might be asked to take the student as an apprentice Probably they would do so as they have an Indian connection, failing this from the advices for technical students at the India Office would probably be able to do something It is usual to pay a heavy fee, from £100 to £300 for practical instruction of this kind If Govt decide to start wood distillation in the State it would be worth while to send a man home to get a thorough practical training & the fee would be money well laid out The student should only be sent to study one Chemical industry

NOTE—Contn sheet

710

16

(R S 12]

General and Revenue Secretariat

File No 746 of 1912-13

Serial No 43

They are very fond of picking up a smattering of half a dozen industries and when they return to India find their experience of little value In this case the student should be told what industry he will be sent to study and he might be allowed to select from

1 Wood distillation
2 Soap manufacture
3 Preparation of edible products from vegetable oils

The India Office might then be asked to find a firm who would, doubtless for a substantial consideration, provide opportunities for acquiring the practical experience necessary

There is nothing more hopelessly stupid than to send an Indian Student to Europe without a clear idea of what he wants to study and what use he will make of the knowledge when acquired

The student should not leave Mysore till all these arrangements have been made as unless he has something definite to go to he will probably waste months in Europe doing nothing

I think I have nothing important to add to the comments made by Mr Chatterton I do not know what the candidates present qualifications in ~~Engr~~ Organic Chemistry are but courses in Organic Chemistry in German or other Universities would hardly fit him for technical work A course in a Technical High School would be better in this regard and might be advisable if his grounding in the subject is insufficient, as a training preliminary to more practical work in a factory. Dr Sudborough and the Director of the Indian Institute of Science should be in a better position than any one else to make definite suggestions

OFFICE OF INSPECTOR GENERAL OF EDUCATION IN MYSORE

No 12079/671 Enc 5

Bangalore 21st April 1913

From M Shama Rao Esq B A
Offg *Inspector General of Education in Mysore*

To
C S Balasundram Iyer Esq B A
Secretary to the Government of His Highness the
Maharaja of Mysore Departments of Education &c

Sir

I have the honour to forward herewith a copy of petition dated the 8th April 1913 from Mr S Garalapuri Sastry a Damodar Das Scholarship holder conducting Organic Research work in the Indian Institute of Science Bangalore applying for a foreign scholarship to enable him to specialize in Organic Chemistry with reference to Agricultural Chemistry mainly with regard to the use and manufacture of manures in a German University for a period of three years

2 Mr S Garalapuri Sastry B A was granted a Damodar Das scholarship by Government Order No 7809-10/Edn 267-11-3 dated 24th April 1912 for a period of three years with effect from July 1912 to enable him to carry on Research work in Organic Chemistry in the Indian Institute of Science From the enclosed copies of reports of Dr J J Sudborough Ph D D Sc F I C Professor of Organic Chemistry of the Institute and of Mr Francis L Usher Professor of Chemistry of the Central College and other professors under whom he has worked it will be seen that the progress of the student is very highly satisfactory and the student is eminently fitted to carry on

the

2

the Research work which he wishes to undertake As the Institute has been closed for summer vacation, he has been working in the Government Agricultural Laboratory with the permission of Dr Bell. C Coleman who forwards his application for a scholarship

3 Under these circumstances I request that Government may be pleased to sanction a Damodar Das scholarship of £200 per annum to Mr Garalapuri Sastri to enable him to study in a German University for a period of three years

I have the honour to be,

Sir

Your most obedient servant,

Offg Inspector General

T & R

Enc. 4 3

Edn 346-12-1

To

The Inspector General of Education in Mysore

Bangalore

Through

Dr Leslie C Coleman

Director of Agriculture

Bangalore

Sir

I am a student of the Indian Institute of Science Bangalore working under Dr Sudborough Professor of Organic Chemistry. I joined the Institute in the month of June 1912 after taking a first class in the B A Degree Examination and undergoing a special training under Professor F L Usher for one year in the Central College and since then I have been engaged in Organic Research Work I am now a Government Scholarship holder of Rs 100 per mensem and this scholarship was granted to me last year (Vide Govt Proc No 7809-10 Edn 267-11-3 dated 24th April 1912)

As I have now a thorough training in the methods of Laboratory work and at present have been engaged in Organic Research Work I want to avail myself of the benefits of an University Education in Germany to specialise in Organic Chemistry with reference to Agricultural Chemistry mainly with regard to the use and manufacture of manures With this end in view I want to stay in a German University for at least three years I have the honour therefore to request the Government to kindly grant me a foreign scholarship to enable me to prosecute my studies in Germany for the period mentioned

The Indian Institute of Science being closed for the Summer vacation I have been working in the Government Agricultural Laboratory after obtaining the permission of Dr Leslie C Coleman I shall stay here until next July

Copies of the testimonials kindly granted me by the Professor under

under whom I worked are herewith enclosed

I remain Sir

Your most obedient servant

INDIAN INSTITUTE OF SCIENCE

BANGALORE INDIA

Department of Organic Chemistry

March 22nd 1913

Mr S G Sastry B A has been a student of the Organic Chemistry Department since June 1912 During this time he has done work in advanced Organic Chemistry and also spent six months on a Chemical investigation

Mr Sastry has a thoroughly sound knowledge of the Science and takes a keen intellectual interest in all his work I have been pleased with the manner in which he has worked throughout the session in the Laboratories He is quick and at the same time accurate and the interest he takes in his work is shown by the fact that during his spare hours he reads the original papers bearing on his experiments

Mr Sastry has a fair amount of initiative and would I am certain make a very good Organic Chemist

As a student of the Institute, Mr Sastry has given two or three papers to the Chemical 'Colloquium' All these have been of a high degree of merit and prove that in taking the study of a particular subject he is able to collect the necessary information from current periodicals many of them German or French to arrange such materials in a logical manner and finally to present the subject to an audience in extremely clear and ~~xxx~~ lucid form

I have always found Mr Sastry a pleasant and agreeable studen to work with

To

My dear Sir,

I am directed to invite reference to your letter No 2033 dt 10th April 1913 forwarding for favourable consideration an application from Mr B Narasimha Ayyangar, B.A., Asst Chemist, for a Research Scholarship to study Agricultural Chemistry in Germany, and directed to invite your attention to the application of Mr Gopalaswami Sastri, B.A., Clerk, Indian Institute of Science, Bangalore

and also

over

SUBJECT

10

for a Junior Scholarship which was
~~you have given~~ submitted through
you to the Dept of Govt and to
request you to kindly favour
Govt with your opinion on the
following points:—

1) Whether the Agricultural
Dept is likely to require two persons
~~Candidates~~ trained in Agricultural
Chemistry in Germany.

2) If only one ~~Candidate~~ such person is
required, which of the two
applicants ~~is better~~ is the better qualified
selected for the Scholarship

A very early Reply will
oblige

Yours truly

DEPARTMENT OF AGRICULTURE MYSORE

Bangalore May 22nd 1922

Dear Sir,

With reference to your D O No 9188/Edn 346-12-2 of the 20th instant I have the following replies to make -

1 The Agricultural Department is not likely to require more than one man trained in Agricultural Chemistry in Germany in the near future

2 I have already expressed my opinion with regard to Mr B Narasimha Iyengar and his work, and if a man is to be sent to study Agricultural Chemistry I think he should be the man He has already gained considerable experience in the work and has acquired a knowledge of agricultural conditions which is very important He has ~~already~~ also conducted a number of enquiries in the field and in the laboratory in a very creditable manner I am unable to speak of the qualifications of Mr Garalapuri Sastri as I have no know-

To
M Visweawriah, Esq ,M I C F ,C I F ,
Dewan of Mysore, Camp Fern-Hill

Sir,

In continuation of my application to the Inspector General of Education in Mysore, requesting the Government to grant me a foreign scholarship to enable me to prosecute my studies in one of the German Universities, with Organic Chemistry in its relation to Agricultural Chemistry as my special subject, I beg to add a few more details

I should very much like to commence my studies from next October (The beginning of the winter term) and with this object in view, I ma have leave India in the middle of August, so that I shall have a month before me to make myself familiar with my altered conditions and this one month will be a preparatory time before joining the University

One or two students who were studying in Germany and with whom I had a talk about this subject, assure me that the maximum advantages are to be obtained by staying in Berlin in which University every branch of Chemical Science is taught and facilities given for specialised subjects of study There is also an Agricultural College at Berlin Under these circumstances I should like to study ir the University of Berlin in preference to the University of Gottingen, where the late Dr VenkataRao was studying But should the Government wish that I should study in any particular place I am prepared to obey their orders

I request also that the Government may be pleased to sarction me £ 75 to enable me to meet my initial expenses with regard to dress, books, &c Hoping that my application will be favourably considered,

I remain, Sir,
Your most obedient servant,

3 S 13

y dear r astri,

I am very glad to learn from your letter that you are thinking of going over to Germany for studies I would advise you to go to Berlin and to join the gricultural College (Landwirtschaftliche Hochschule) there in the first session The terms commence on or about the middle of October I am sorry I have not got any calender with me hat I have got a list of the lectures in the Berlin University with the lectures which they delivered in the session 1909-1910 But that will be of no use to you If you join the place, I have mentioned you can also attend he lectures that are delivered in the Berlin University By going there you will be able to find out yourself who will be the proper person to go to for gricultural Chemistry

There are two terms in an cademical ye r The best time to cross over to Europe is the beginning of April But August will not be a bad time You could be in time for the inters se sion commencing on the 15th of October and c ild use the few weeks before the begining of the session for learning the language properly

There are no hostels attached to the University but my friends will help you to find out suitable rooms and you could if you like live a strict vegetarian

£[illegible]00/- will be quite sufficient for ll your expenses there It will enable you to live quite decently and to travel a little during the vacations I shall be glad to give you letters of recommendation to some English speaking gentlemen at Berlin before you go

Yours sincerely,
Sd/ [illegible] C [illegible] ter MA I

Bangalore 21st July 1913

From M Shama Rao Esq , M A ,
Inspector General of Education in Mysore

To
C S Balasundaram Iyer Esq , B A ,
Secretary to the Government of His Highness the
Maharaja of Mysore, Departments of Education &c

Sir

In continuation of my letter No 12079/671 dated 21st April 1913 submitting a copy of application dated 8th April 1913 from Mr S Garala puri Sastri, a Damodar Das scholarship holder in the Indian Institute of Science, Bangalore, applying for a foreign scholarship to enable him to specialise in Organic Chemistry, with reference to Agricultural Chemistry in a German University for three years, I have the honour to forward herewith for favourable consideration, a copy of another application from the student applying for a scholarship for the study of pure Organic Chemistry in place of Agricultural Chemistry, in the event of his not getting a scholarship for the latter subject and requesting early orders on his application, as he means to leave India for Germany by about the end of August next

I have the honour to be,
Sir
Your most obedient servant,

M. Shama Rao

Inspector General

Department of Organic Chemistry,
Indian Institute of Science,
Hebbal Post Bangalore
18th July 1913

To

The Inspector General of Education in Mysore
Bangalore

Sir,

In connection with my application for a Damodardass Scholarship to go to Germany to study Agricultural Chemistry, I beg to add the following few points -

Coming to know that there is another candidate for the same scholarship, I have submitted a supplimentary application to the Dewan on 9th June, 1913, requesting the Government to grant me the scholarship for a special study of Organic Chemistry, in the event of my not getting it for Agricultural Chemistry

I wanted to leave India for Germany by about the end of August, 1913 so as to be in time for the term commencing in October, this year, and as yet I have received no orders from the Government

I beg to bring also to your kind notice that I was elected a Fellow of the Chemical Society, (London) on May 15th 1913

I request you under these circumstances to recommend me for a scholarship to study Organic Chemistry, and to kindly expedite the matters, so that I may have at least a month before me as the preparation time

Hoping that my request will be granted,

I remain,
Sir,
Your most obedient servant,

(Sd) S Garalapury Sastry,

(Copy)

Inspector General

Enclosure 1/8

To
M.Visweswariah, Esq , M.I.C.E ,C I E.,
Dewan of Mysore, Bangalore

Sir,

In connection with my application requesting the Government to grant me a scholarship tenable for three years at a German University, I beg to add the following few lines:

I have recently come to know that another candidate has applied for a scholarship to study Agricultural Chemistry, in one of the German Universities. The subject I chose was also very nearly the same: viz. "Organic Chemistry with special reference to Agricultural Chemistry "

Under these circumstances, should the Government find that they cannot give me the scholarship for Agricultural Chemistry I request that the Government may be pleased to sanction me the scholarship for a study pure Organic Chemistry, or to the stud of any other subject that they may have in view.

Hoping that my request will be granted,

I remain, Sir,

Your most obedient servant,

S Varadapuram Sastry

Malleswaram,

DEPARTMENT OF AGRICULTURE, MYSORE

Bangalore 4, 8 1913

Dear Mr Balasundaram Iyer

I understand that the application of B Narasimha Iyengar of ~~the~~ Office for a Domodara Das scholarship has been favorably received by Government and that a Government order on the subject is in the course of preparation

If this is the case as statement from me as to the work he should take up and the University where he should study may not be out of place

Mr Narasimha Iyengar should proceed to Gottingen University where the late Dr B Venkata Rao studied He should there enter the Laboratory for Agricultural

19 20

where he can get into touch with
the latest methods of sugar manufacti
There is one of these at Northern
about twenty miles from Gottingen
The fact that Dr Venkatakas
has already studied at Gottingen
should remove all difficulty
in the way of his being admitted
and as I am pretty well known
Gottingen myself I shall
make his admission as
easy as possible

Yours sincerely
Leslie Coleman

Chemistry which is now under the
directorship of Prof Ehrenberg, Professor
Tollens having retired He will then
be able to take Agricultural Chemistry
as his major subject for the doctor's
degree and should take as minor
subjects General Chemistry and
Agricultural Bacteriology both
of which subjects are closely related
to Agricultural Chemistry and
will be of great use to him in his
work

He will probably require
three years to finish up though
he may be able to get through in
two years and a half He should spend
his vacations at various
Experiment stations in Germany
notably the one at Darmstadt under
Prof Wagner and the one at Mockern
near Leipzig He should also spend
at least one vacation in one of
the large German Sugar factories

INDIAN INSTITUTE OF SCIENCE
BANGALORE

R O No 165

15th August 1913

My dear Sir,

I have to acknowledge the receipt of your letter of the 12th instant with regard to Mr Garlapuri Sastry, B A I have to call attention to the fact that Dr Sudborough did not recommend Mr Sastry for the scholarship, and did not advise him to proceed to Germany, and that this is the first occasion on which this matter has been brought officially to my notice The matter was mentioned to me by Mr Sastry and I presumed that the Mysore Government were acting on some definite principle, and that for this reason they had not consulted either me or my staff in the matter I may tell you definitely that, in my opinion, Mr Sastry will gain more by staying in the Institute than by spending 3 years in Berlin in order to obtain the Ph D Degree

With regard to the latter part of proposed scheme of studies for Mr Sastry,-that he should

study in turn wood-distillation, oils & fats, and plant analysis, I must point out that it will be quite impossible to Mr.Sastry to follow such a cours unless the Mysore Government extend his scholarship for a period of some eight years

Yours sincerely,

M L Dawn

To

T Shama Rao, Esq.,

Inspector-General of Education in Mysore,

Bangalore

21

Malleswaram, Bangalore

14-8-1913

To

The Inspector General of Education in Mysore,

Bangalore

Sir,

In view of there being possibly some difference of opinions with regard to the course of studies I may have to take up at Berlin, I request the Government to kindly allow me to take the Ph D degree with Organic Chemistry as the primary subject, and then in cosultation with the professors under whom I shall be working, and also with the approval of the Government, to allow me to choose a special subject to be studied on practical lines This arrangement will give me time and an oppurtunity to study on the spot, and submit a report about, the various branches of Chemical Technology which can be studied by me conveniently, and after receiving my report the Govt may select the subject I am to specialise in I shall improve upon the lines I have alreacy indicated to the Government, in consultation with the Professors there

Hoping that this will meet the approval of the Govt

I remain, sir,

Your most obedient servant,

S Ganalaxmy Sastry
